

A world full of pollution
A shit infested sea
We'll make our own solutions
Take 'em down make 'em see
You can't dump in the ocean
Waste from your endless greed
Come to our own conclusions
Must unite to be free
Cause salvation's on it's way
When we are united there's nothing standing in our way
On our own agenda and we're gone have our say
You're never gone stop us we're never gone go away
Corporations run the nation
We have to make a stance
Let's start a revolution if we can't no one can
We must be represented or it's not democracy
Let's put our minds together and soon comes victory
Cause salvation's on it's way
When we are united there's nothing standing in our way
On our own agenda and we're gone have our say
You're never gone stop us we're never gone go away
What good is government when they just want to govern me
We'll make our own decisions take 'em down make 'em see
We got to stand together
We got make some noise
Numbers can change the system
With one sound with one voice
