

Tomorrow

Pennywise

Deep down inside I see
That blank broken stare
That look in your eyes
Says you'll go nowhere
You live your life trapped in a charade
The time has come for you to make a change

You used to be my hero
You used to be my strength
When all else failed and the ship was sinking
You gave me hope through your faith
And now we live in suffering

Tomorrow our day will come
And the world will be ours
No sorrow strength for the weak
As we take back your lives
We will follow all of our dreams
As we destroy their lies
And tomorrow our day will come
And the world will be ours

You can hope the future
Doesn't look like today
You stare at the sky
And hear the prophets say
That nothing ever lasts
And everything will come to pass
How will we ever find a way

We'll keep on moving forward
No matter what they say
There is no future
There is no past
Only you that controls your fate
And now we live in suffering

Stand up stand tall stand proud
Remember where you're coming from
And who will stand beside you
Rise up right now sing loud
And never turn your back on us
Or we will never break through

It time to find the strength inside
And leave this fucked up world behind
Appreciate what you've been given
And never give up on your chance
Your chance to live

Sometimes we all fall down
And the world will be ours
Our lives we take back now
And the world will be ours

And the world will be ours
