

## Underwater Dream

Penumbra

I can see you through the surface  
I know that you calling me  
I can see you through the surface  
Discovering more than others see

Movements of waves distort your face  
But you make me feel you're so beautiful  
There are no pain and no disgrace  
This world seems so peacefully

Just fall into the water  
gliding deeper and deeper  
Don't take your breath don't swim  
It's an under water dream

Shall of fishes turn around me  
In the silent carousel  
My vision is not very clear  
But I hearing your strange spell

So guide me in this trouble world  
Call me with your crystal voice  
If it's me you are waiting for  
Let me come to you my love

You are down and I still not there  
You can't hear my presence around  
You realize there's nothing here  
You don't want to touch the ground

Now, you can hardly see the light  
Your darkness grave waits for me  
You want to move but you can't fight  
You are alone in this cold sea
