

Know By Now

People In Planes

Without you it's nothing
It's just a room with a view
And all these things, we've collected
Just remind me of you

And everything I do
And every word I say to you
There's nothing getting through
Is it over?

I should know by now
Know by now
You let me go, you let me go
From you

I should know by now
Know by now
Somehow I knew I would not get through
To you

Is there blood in your system
Are their stones in your heart?
Alien creation
Go and find your own star

And everything I do
And everytime I talk to you
Nothing's getting through
Is it over?

I should know by now
Know by now
You let me go, you let me go
From you

I should know by now
Know by now
Somehow I knew I would not get through
To you

I have to say you fascinated me
But was it real or was it just a dream?

I should know by now
Know by now
You let me go, you let me go
From you

I should know by now
Know by now
Somehow I knew I would not get through
To you

I should know by now
Know by now
You let me go
(So we break down too)?
