

Never Ending Summer

Pepper

In the never ending summer
In the never ending summer

No need to tell me what you'll be when you grow old
We can take it fast or we can take it slow
We both know when the lights get low

That I can help you light a fire when you get cold
We can burn it fast or we can burn it slow
You can ask me anything you want and I'll know

These wounds make hearts like ours
Here's to new days new starts

Cause honey I wanna know you better
And I can see my favorite things in you and that means everything to me.
Can't deny that I can love you better
And I could do some crazy things with you in the never ending summer

In the never ending summer
In the never ending summer

You'll have to tell me all the stories from the night before
Cause I was drinking fast and you were drinking slow
We just laughed from the sheets below

Never thought you'd be the one to lock me down though
But you read me fast and then you kissed me slow
I just thought that you'd like to know that

These wounds make hearts like ours
Here's to new days new starts

Cause honey I wanna know you better
And I can see my favorite things in you and that means everything to me
Can't deny that I can love you better
And I could do some crazy things with you in the never ending summer

In the never ending summer

There's a million things to do
Crazy things to do
All my favorite things to do
But Imma take it fast and slow with you
You're kinda like my summer
You're like my never ending summer

Cause honey I wanna know you better
And I can see my favorite things in you and that means everything to me
Can't deny that I can love you better
And I could do some crazy things with you in the never ending summer

There's a million things to do
Crazy things to do
All my favorite things to do
