

The snow coming down now  
Like December, burning up in the summer rays  
But I'm not stumbling, like a pretender  
Medicine flowing through my veins

Heavy eyes but a tongue won't stutter  
Mouths are moving and this heart's still fluttering  
I'm on my own  
You found me in the cold, now I am  
Wrapped within the warmth of your touch  
There's never a moment that I'd let slip by, in your eyes  
Are we growing old day and day?  
Am I melting in the rays of this love?  
Never ever gonna let you go  
Don't let go

Never gonna let you go

Slow it down, now  
I cannot remember  
Why I let them chew on my brain  
They've come and left this town  
In smouldering embers  
But my gift will die in your eye

Heavy eyes but a tongue won't stutter  
Mouths are moving and this heart's still fluttering  
I'm on my own  
You found me in the cold, now I am  
Wrapped within the warmth of your touch  
There's never a moment that I'd let slip by, in your eyes  
Are we growing old day and day?  
Am I melting in the rays of this love?  
Never ever gonna let you go  
Don't let go

Do you feel the love?  
Yes, I feel the love  
Chase it, hold it, feel it, never let it go  
Do you feel the love?  
Yes, I feel the love  
Do you feel the love?  
Yes, I feel the love  
Chase it, hold it, feel it, never let it go  
Never let it go  
Don't let go  
Don't let go
