

I hate the world

Perkele

You wonder where the aggression's coming from
You wonder where the hate is coming from
Take a look around what do you see
People getting dumber everyday
Thinking about money everyday
There's only the one thing left to say

I hate
I hate the world
So much

You wonder where the violence are coming from
You wonder where the fists are coming from
Take a look in my eyes what do you see
People getting more selfish everyday
People getting more disrespectful everyday
There's only one thing left to say
