

Leave Me Alone

Perkele

I chase shadows, and I really don't know where to go
Please someone help me, to light the ghost inside my head
I hear voices, sometimes they tell me what to do
Leave me alone, let me take command over my own life

Get the hell out of my life
Get the hell away from me
Let me go, leave me alone

I live in darkness, and I really don't know how to breathe
Please someone help me, to find the way out of the dark
I feel panic, and it holds a grib around my heart
Leave me alone, let me take control over my own life
