

## In Sickness and Death

### Pestilence

The sick become now the dead  
Breaking out of the boundaries  
Leaving all behind with or without regrets  
Spawning out as new entities

The ones left behind mourn their loss  
Not wanting to let go but the corpse  
Can't stand the test of time and decomposes

Excruciating grief and pain of the heart  
Years of agony and living in sorrow  
Can't live without you, worlds apart  
I feel so hollow

Freezing cold - Preserves the carcass

Freezing cold preserves the carcass  
Of the person you once loved  
The past in your mind you rehash  
The proof of existence's residue

Freezing cold - Preserves the carcass

In Sickness and Death

Freezing cold preserves the carcass  
Of the person you once loved  
The past in your mind you rehash  
The proof of existence's residue

Residue

Freezing cold - Preserves the carcass

In Sickness and Death
