

Elvis Is Dead

Peter and the Test Tube Babies

Elvis had an heart-attack, 'cos he got too bleedin' fat.
He weighed nearly half a ton, he looked more like a pregnant mum.

Elvis is dead, Elvis is dead.

Elvis had a gammy leg, he had a gammy head.
He had a gammy kidney, he's better-off dead.

In August 1977, Elvis met his fate.
But he couldn't get into heaven, 'cos he couldn't get thru the gate.
