

I See You

Peter Andre

You've got the curves the sway I can't look away
Girl you've got my pure devotion
With every move you make
So hard I could break
Girl you're poetry in motion

Oh baby you know you're driving me crazy
But tonight I'm watchin' every dream I have come true

You say I will show you mine
If you will show me yours
And one by one we're throwin' all our clothing on the floor
You say don't blow out the candles cos' I want you to see
That suddenly you're naked standing right in front of me

You've got the mouth the lips girl I've gotta kiss
All your body's made for pleasure
You make me feel like a man should feel
Like I'm made of steel you've got that hidden treasure

Oh baby you know you're driving me crazy
But tonight I'm watchin' every dream I have come true

You say I will show you mine
If you will show me yours
And one by one we're throwin' all our clothing on the floor
You say don't blow out the candles cos' I want you to see
That suddenly you're naked standing right in front of me

Oh baby I see you

You say I will show you mine
If you will show me yours
And one by one we're throwin' all our clothing on the floor
You say don't blow out the candles cos' I want you to see
That suddenly you're naked standing right in front of me
You say I will show you mine
If you will show me yours
And one by one we're throwin' all our clothing on the floor
You say don't blow out the candles cos' I want you to see
That suddenly you're naked standing right in front of me

Oh baby I see you
