## **Down Like Me**

## **Peter Bjorn and John**

I have been, inside you war zone
And I've seen, you drop your poison
You compromise the steal
Telling people how you feel
Though it's not a bit for real
But the dollar it gives you wills
And you're longing to be free
But no one brings me down, like me
No one brings me down like me

Have you heard? When greed meets hunger How absurd, the weak is stronger Cause when they are satisfied They sigh and wipe their mouth And they sleep til they awake But for you there's too much at stake You have to plan the next big break You rest when you are dead like me Rest when you are dead, like me Down like me

No one brings me down down down Down like me [repeat 5x]
