They Don't Make 'Em Like They Used To

Peter Cetera

It's every young boy's fancy
It's there hidden deep in the heart of a man
It's just a feeling
They won't ever understand

They know they gotta have one A brand new model and it's here today And don't you know that she's made right here in the U.S.A.

Don't ever stop trying Don't let her get away They don't make 'em like they used to I think they're better than before It's more than physical attraction Keeps you coming back for more

She's a home grown beauty She's born and raised with a mind of her own And once you find her You'll never want to leave her alone

She's making you crazy You can't live without her, she's here to stay Don't you know that she lives right here in the U.S.A.

Don't ever stop trying Don't let her get away They don't make 'em like they used to I think they're better than before It's more than physical attraction Keeps you coming back for more

They don't make 'em like they used to They're so much better than before

I'm so tired of hearing--(I'm so tired)
Some people say--(what people say)
Everything is moving much too fast
Things were better in the good old days

Let them have their opinions--(let them have...) Never gonna change their mind--(they'll never change) They lived a long time ago When times were tough And a real good woman was hard to find

They don't make 'em like they used to I think they're better than before It's more than physical attraction That keeps you coming back for more

Don't ever stop trying Don't let her get away They don't make 'em like they used to I think they're better than before It's more than physical attraction Keeps you coming back for more They don't make 'em like they used to They're so much better than before
