

Sails Wave Goodbye

Peter Murphy

Dream - the light was shining hard
And though the lie was the night
Dream - you were the light and colliding with the stars
In a way - my guide

And there signs will pave the way that you go
In the light of the silver Moon

Sails and wave good bye
Sails and wave good bye

Looking out from a bridge
Sails wave good bye
Behind a curtain
Activate and join
My mind devoid
Reinstate my beloved

So, time tells all when we are old and removed
And we'll side with the silver Moon

Sails and wave good bye
Sails and wave good bye
