Sails Wave Goodbye

Peter Murphy

Dream - the light was shining hard

And though the lie was the night

Dream - you were the light and colliding with the stars

In a way - my guide

And there signs will pave the way that you go In the light of the silver Moon

Sails and wave good bye Sails and wave good bye

Looking out from a bridge Sails wave good bye Behind a curtain Activate and join My mind devoid Reinstate my beloved

So, time tells all when we are old and removed And we'll side with the silver Moon

Sails and wave good bye Sails and wave good bye
