Right Place

Got no place to run, gotta look up to see the bottom No visible support - no one there you can lean on You're all on your own - you know it's sink or swim There is no doubt about it, you have to look to Him

When you think you've had enough No more you can do When you feel like giving up Deadline is in view When your time is almost gone You haven't got a clue Now's the time to turn your face

You're in the right place - trusting only Him You're in the right place - kick back and just depend You're in the right place - to see what He can do You're in the right place - He will come through

When you're sinking fast - takin' water in your boat No one to bail you out - you think it's all she wrote The odds are against you - your chances slim to none A hopeless situation - you got no place to run

No one has a rescue plan Waiting in the wings Now's the time to call His name He can do all things When your self-reliance fails You still have a prayer You will have to trust His grace

When you abide, He will provide Never shorthanded When you will pray, He'll make a way He won't leave you stranded
