## **Sacred Trust**

You never tried to win more secular appeal And water down Your message with a slightly different feel You never tried to be politically correct Or skirt around the issue attempting to connect

You spoke the truth in love so faithfully You expect no less from me

It's a sacred trust that You gave to us To take Your Word into all the world It's a sacred trust that You gave to us The message of salvation and Your love

You never shied away from critical debate Or beat around the bushes when discussing human fate You weren't ashamed to tell them who Your Father was Never ran from persecution like human nature does

You prayed for all believers on Your knees Then you handed us the keys

It's a sacred trust that You gave to us To take Your Word into all the world It's a sacred trust that You gave to us The message of salvation and Your love

You're trusting us to be bold The story has to be told To every nation and tongue Young and old I'm gonna shout from the hill How could I ever be still? I'm gonna let the chips fall Where they will

You spoke the truth in love so faithfully You expect no less from me

It's a sacred trust that You gave to us To take Your Word into all the world It's a sacred trust that You gave to us The message of salvation and Your love
