Sight Unseen

For so long I was depending upon My senses and fences, I tried to ride on And trusting in things that can never be seen Was always a crutch on which others must lean Thinking if I could see I would believe Then somebody said believe and you will see

Sight unseen, sight unseen You have to take it sight unseen Blinded by the darkness only faith can come between Sight unseen, sight unseen

Evidence built into every design Led to conviction between every line Faith is the key that can open the veil To Love incarnated and pierced with a nail Listen my friend, have I got news for you The nails in His hands and feet were meant for you
