

Every Word You Say

Petula Clark

There's a light up ahead
Take me where it will lead
Wherever you are
Reaching out through the dark
I can see, here you breathe
I'll follow where you are

I know I'm in too deep
When your love washes over me
Don't know where it may lead
But I'll go where it's taking me
So, slowly as we walk away
I will hold onto every word you say

Everywhere that you are
I can feel all around, feel your heart beat
Every heart has a sound
And the way that yours speaks
It echoes back to me

I know I'm in too deep
When your love washes over me
Don't know where it may lead
But I'll go where it's taking me
So, slowly as we walk away
I will hold onto every word you say

I'm breaking piece by piece
With your love rushing over me
I know I'm in too deep
And it's not long until you leave
So, every time you walk away
I will hold onto every word you say
