

Lonely Day

Phantom Planet

I could tell from the minute I woke up
It was going to be a lonely lonely lonely lonely day.
Rise and shine rub the sleep out of my eyes
And try to tell myself I can't go back to bed
It's gonna be a lonely lonely lonely lonely day.

Even though the sun is shining down on me and
I should feel about as happy as can be
I just got here and I already want to leave
It's gonna be a lonely lonely lonely lonely day
It's gonna be a lonely lonely lonely lonely day.
It's gonna be a lonely lonely lonely lonely day.

Everybody knows that something's wrong
But nobody knows what's going on
We all sing the same old song
When you want it all to go away
It's shaping up to be a lonely day
I could tell from the minute I woke up
It was going to be a lonely lonely lonely lonely day.
It's gonna be a lonely lonely lonely lonely day
I could tell from the minute I woke up
It was going to be a lonely lonely lonely lonely day.
It's gonna be a lonely lonely lonely lonely lonely....
Everybody knows that something's wrong
But nobody knows what's going on
Everybody knows that something's wrong
But nobody knows what's going on.
