

# Quarantine

Phantom Planet

Behind the glass  
I watched the world  
From cracks the blinds make when they're drawn  
I watched the world for years this way  
And that catches us up to this moment today

Quarantine  
The rock and the hard place I'm between  
Quarantine, quarantine, quarantine

And it was you I did this for  
I put the deadbolt on the door  
Understand I can't see you now  
Realize it's not to keep me in, but to keep all the sickies out

Quarantine  
Such an ugly word for what I mean  
Quarantine, quarantine, quarantine

I heard you let some little flea  
Give you that contagious disease  
You let him climb right on you two  
And it's been plaguing me too

La la la la, la la la la  
La la la la, la la la la

Realize it's not to keep me in, but to keep all the sickies out

Quarantine  
The rock and the hard place I'm between  
Quarantine (7x)
