Quarantine

Phantom Planet

Behind the glass
I watched the world
From cracks the blinds make when they're drawn
I watched the world for years this way
And that catches us up to this moment today

Quarantine

The rock and the hard place I'm between Quarantine, quarantine, quarantine

And it was you I did this for
I put the deadbolt on the door
Understand I can't see you now
Realize it's not to keep me in, but to keep all the sickies out

Quarantine

Such an ugly word for what I mean Quarantine, quarantine, quarantine

I heard you let some little flea Give you that contagious disease You let him climb right on you two And it's been plaguing me too

Realize it's not to keep me in, but to keep all the sickies out

Quarantine

The rock and the hard place I'm between Quarantine (7x)
