

# Big Noise

Phil Collins

Just set your sight high, look  
'em right in the eye and take it  
And make a big big big noise.  
Don't ask why  
Just take it wise and making it  
Make that a big big big big noise.

You can feel it in the air  
Feel it everywhere  
There's a spirit moving  
At just look, it's all around you  
Just take a look around you people stars ??? to loose it  
Cos if you wanted you gotta go get it  
Just to listen up  
If there's something that you need  
You better believe

Just set your sight high, look  
'em right in the eye and take it  
And make a big big big noise.  
Don't ask why  
Just take it wise and making it  
Make that a big big big big noise.

Better make your play  
Don't let her thing like right or wrong, get it  
Cos there's nothing to it if you just if you reach out and do i  
t, it'll be ok  
Just catch yourself a piece of the action  
Just to listen up  
If there's something that you need  
You better believe

Just set your sight high, look  
'em right in the eye and take it  
And make a big big big noise.  
Don't ask why  
Just take it wise and making it  
Make that a big big big big noise.

Cos if you wanted you gotta go get it  
Just to listen up  
If there's something that you need  
You better believe  
Repeat chorus to fade...
