## **That's What You Said**

**Phil Collins** 

I remember the night you weren't at home (had to work late is what I heard) That's what you said I can never forget the way it felt, You needed some time to work it out, That's what you said And now I feel a fool.

'Cos late at night I call your name, I'm wondering what for, 'cos I've seen those other guys Sniffin' around your door.

Whatever happened to the words 'Lovers for all eternity?' That's what you said, I was your rome, you were my Juliet, Eternally That's what you said And now I feel a fool.

'Cos late at night I hear your voice Calling out my name, Oh I know it's just a dream But every night's the same.

I carried a torch for you, through the thick and thin You know it don't seem right that I won't see you again No no

Late at night I call your name, I'm wondering what for, 'cos I keep seeing those other guys Sniffin' around your door.

I carried a torch for you through the wind and rain I'll never forget you, but I won't see you again No no

I thought your friends all liked me I thought I fitted in just right, That's what you said. Soon I'll be gone and you'll be free, You can go find the things that you want. That's what you said And I won't feel a fool

'cos late at night I still call your name, I'm wondering what for, 'cos I keep seeing those other guys Sniffin' around your door.

What for?
