

# Lead On

Phillip Phillips

I see you in my dreams  
Seems like you never leave  
You are the blur in my eyes  
As I wake up through the night

Ten thousand hands can't hold  
This heavy heart of stone  
I feel it break like glass  
Still I keep coming back

So pick me up then throw me down  
Shine the light then turn it out

You make your way through the fire  
I stand inside and I get burned  
You make your love a liar  
I'm hanging on to every word  
I can't quit you  
And I'm fine with being used  
Lead on, lead on and I'll follow  
Lead on, lead on

And I'll follow wherever you go  
Right down that rabbit hole  
Then everything gets dark  
And I feel pulled apart

Running through my blood  
You are the rarest drug  
With every word I breathe  
I see the way you've changed me

Around then throw me down  
Shine a light then turn it out

You make your way through the fire  
I stand inside and I get burned  
You make your love a liar  
I'm hanging on to every word  
I can't quit you  
And I'm fine with being used  
So lead on, lead on and I'll follow  
Lead on, lead on

Paint the road to see the way  
Should I go or should I stay  
I'll come around again  
I'll come around again

We never learn to let it go  
Always feel it as you grow  
It comes around again  
It comes around again, so

Lead on lead on and I'll follow  
Lead on lead on  
And I'll follow you into the night

Let's get lost until it's light

You make your way through the fire  
I stand inside and I get burned  
You make your love a liar  
I'm hanging on to every word  
I can't quit you  
And I'm fine with being used  
Lead on, lead on and I'll follow  
Lead on, lead on and I'll follow  
Lead on, lead on and I'll follow  
Lead on, lead on and I'll follow  
Lead on, lead on and I'll follow  
Lead on, lead on
