Army of One

Phish

Northern dilemma, call of the cold The arms of the arctic begin to unfold Sit in a circle facing the sun Get what you can now, winter is on

Truth on condition, never dig deep Solemn reminders as groundwaters seep Into foundations, centers of joy To weaken and crumble, search and destroy

Light up the city, hiding so strange You'd better take cover, it's love at close range Oh solo mission, cover of dark Army of one now, don't let down your guard

Sit in a circle facing the sun
Soak it in while you can, winter is on
I got no answer but you've got no call
I just can't compete with the weight of it all

Silent treatment, stone in the rain Bright, shining doorway, try to remain Northern dilemma, call of the cold The arms of the arctic begin to unfold

Sit in a circle facing the sun
Soak it in while you can, winter is on
I got no answer but you've got no call
I just can't compete with the weight of it all
