

Life Has Not Finished With Me Yet

Piano Magic

Life has not finished with me yet
Life has not finished with me yet
I've stood on the ledge, peered over the edge
Life has not finished with me yet

Life has not finished with me yet (no)
Life has not finished with me yet
I've put blade to vein but I can't bear the pain
Life has not finished with me yet

Life has not finished with me yet
Life has not finished with me yet
A gun in my hand but the trigger, it jammed
Life has not finished with me yet

Life has not finished with me yet (no)
Life has not finished with me yet
The pills won't go down and the body won't drown
Life has not finished with me yet

I called all my friends
And I made all amends
Left letters all over my desk
But God picks the slot
'X' marks the spot
And time it takes care of the rest
I cursed Him in church
And I did the research
Found ways that were painless and quick
But fate has a hand, however well planned
To tempt it, well, that is the trick

Life has not finished with me yet (no)
Life has not finished with me yet
Life has not finished with me yet (no)
Life has not finished with me yet
Life has not finished with me yet (no)
Life has not finished with me yet
Life has not finished with me yet (no)
Life has not finished with me yet
