

## Love & Music

Piano Magic

Well, i left home when i was 16  
I had no reason, had no rhyme  
I did not know where i was going  
It did not matter at that time

And there were people on the street, people on the street  
The strangest people that you'd ever meet  
There were people on the street, people on the street  
The strangest people that you'd ever meet

I got a job in the factory  
I broke my back, i swept the floor  
I met a girl who said she loved me  
I hadn't heard those words before

And all i knew was love and music  
Love and music got me by  
And all i need is love and music  
Love and music 'till i die

All i need is love and music  
Love and music gets me by  
All i need is love and music  
Love and music 'till i die
