## Jupiter's Eye

## **Pig Destroyer**

Doomed lovers in a free fall Together till they crash to the ground I long for my sweet disappearer As this avalanche of night Slides down Black haired angel by the bonfire With alien eyes divine they flicker a moment In the flames then follow the smoke Into the sky It's like losing a limb This agonizing goodbye My dreams of her are violent All swirled in red Like the storm in Jupiter's eye All swirled in red Like the storm in Jupiter's eye
