Without Me

Pinhead Gunpowder

People come and go there's a lot of Places believe me I know worth Going to worth leaving from but Please take me when you leave or Believe in me and stay

If I said I couldn't go on living Without you now that would be a lie But if you knew how it looks inside My head my house is really bad enough But this is really bad it's pretty bleak And I'll be very sad at least if You decide to leave Without me

Cuz this only happens once in a great While five or ten times in a lifetime Maybe less I don't know but I don't Want to blow my chance this time around

I shouldn't be so worried I mean we Just met but just like the first time You saw me you said "Now there's a guy Who never sticks around" I guess we Have that much in common and that's Why you hunted me down

Isn't that sweet? Please don't leave Without me
