

# Wanna Hear You Rock

Pink Cream 69

Out in the jungle there's a  
Growing hunger and I  
Think it's time to hear the music that we love  
Getting sick of all this nonsense  
People come and go at dispense  
There's too much bullshit being shoved into my head

I wanna hear you rock  
I wanna sooth my soul  
I wanna hear the DJ play the music that I love  
I wanna hear you rock  
You got to take control  
Because there's too much monkey business to think of

What a dirty business?!

There's something in the city  
They're getting down and gritty  
It's a revolution, and it's comin' down your way (comin' down your way)  
You've got to drive us wild and  
Cut loose our inner child and  
Do you get my message? Cause there's nothing left to say

I wanna hear you rock  
I wanna sooth my soul  
I wanna hear the DJ play the music that I love  
I wanna hear you rock  
You got to take control  
Because there's too much monkey business to think of

I wanna hear you rock  
I wanna sooth my soul  
I wanna hear the DJ play the music that I love  
I wanna hear you rock  
You got to take control  
Because there's too much monkey business to think of

I wanna hear you rock  
I wanna sooth my soul  
I wanna hear the DJ play the music that I love  
I wanna hear you rock  
You got to take control  
Because there's too much monkey business to think of

What a dirty business?!
