

If Love Could Change This World

Pink Turns Blue

Time has come to say goodbye
You know it's a very special night

New deeds need to be done
Only action can thrive
Only steps can cover

If only love could change this world
This march of time
If love could change this world
It bleeds inside
Love could change this world
It's paralysed
If love could change this world
From night to light

Was trying too hard to make a change
Trying too hard to be of use

Call this evolution
Call this art or beauty
It doesn't do a thing

If only love could change this world
This march of time
If love could change this world
It bleeds inside
Love could change this world
It's paralysed
If love could change this world
From night to light

Hopeless faces in the streets
People freezing starving dead

Not giving up - I'll save you
What does fortune mean
Endless daydream dreaming

If only love could change this world
This march of time
If love could change this world
It bleeds inside
Love could change this world
It's paralysed
If love could change this world
From night to light
