

## Break Out

Place Vendome

When you're all alone  
And your door is closed  
The dark is taking over  
It's hard to keep the faith  
And you're feeling weak  
You never wanna wake up

Whatever happened before  
It will all fade away  
It won't stay like this forever  
I know all gonna change tonight  
A brand new day will come

We're gonna break out  
I have no doubt  
That tonight we all gonna be free  
We will tear down these walls  
We will break our chains  
No more reasons to stay

They gonna hunt us  
Everyone wants us  
But we are already far away  
We will run for our lives  
And we'll never look back

Now or never  
It's time break out

The life is way too short  
Can't you understand  
We can't hide forever  
Don't matter where we go  
We will always know  
We didn't waste our life
