

Broken Wings

Place Vendome

It's been a while my long lost friend
But things have changed and time is moving on
'Cause nothing stays the same at all
The light was whining but now it's fading
What's to come is something I don't know
It's out of my hands

I spent my time in another world
Couldn't see the answers from my lies
That day will never come again
I mistreated, denied it
That chance to see the sun from a different point of view
Try to make it right

Broken wings
Can't help me now I'm in too deep
There's no way out
I close my eyes and drift away
Broken wings
Are all I'll have when life passes by
Roll the dice
And take a chance living with broken wings

I had it all but still I searched
Put my faith in a road going nowhere
How could I be so blind again
Things have changed and now I've seen
The fire in my eyes burns just for you
Let's leave this world behind

Broken wings
Can't help me now I'm in too deep
There's no way out
I close my eyes and drift away
Broken wings
Are all I'll have when life passes by
Roll the dice
And take a chance living with broken wings
