You and me, we like the same kind of music That's why we, make a good you and me We got style, baby we know how to use it That's why we, make a good you and me

You know what I'm going to say before my mouth even makes a sou nd

And that's why we make a good you and me

You and me, we couldn't stand being normal That's why we, make a good you and me We both laugh, at the most random situations That's the key, baby don't you agree?

You know what I'm going to say before my mouth even makes a sou nd

And that's why we make a good you and me

I know from the sound of your breathing exactly what you are fe eling

This is why we make a good you and me Make a good you and me Make a good you and me You and me

Ah ah ah ah You and me, all we need is each other That's why we, make a good you and me

You know what I'm going to say before my mouth even makes a sou nd

And that's why we make a good you and me

I know from the sound of your breathing exactly what you are fe eling

This is why we make a good you and me Make a good you and me Make a good you and me You and me
