

Inside all the people a jet black spark  
rippeling like magma in their hearts  
under all the hot lights n' gyroscopes  
physically pulsing as the shake of their bones

feeling kinda lonely we're fucked up and cold  
feeling kinda lonely underneath the soul  
I was... feeling kinda lonely

boys are shaking girls are rotating  
make my real life melt into the floor  
boys are shaking girls are rotating  
make my real life melt into the floor

inside all the people an onyx flame  
flickering and rising into their brains

smothered in a blue light  
covered in a noise  
Oscillating girls  
Oscillating boys

feeling kinda lonely we're fucked up and cold  
feeling kinda lonely underneath the soul  
I was... feeling kinda lonely

boys are shaking girls are rotating  
make my real life melt into the floor  
boys are shaking girls are rotating  
make my real life melt into the floor

make my real life melt into the floor

boys are shaking girls are rotating  
make my real life melt into the floor  
boys are shaking girls are rotating  
make my real life melt into the floor
