

See You Soon

PlayRadioPlay!

With your small town charm and contagious smile
I think I might like to stay for a while,
After a birthday with swimming and movies
Old school karaoke

We sat and talked but not for long
You mentioned this is your favorite song
After the party we took off
To your house later, our favorite spot

You cried when you had to leave
Mascara stains on my sleeve
I was depressed and my stomach hurt
I kept the memories, I kept the shirt

And I know we will see each other soon
And I know we will see each other soon
We will see each other soon
We will see each other

And I know we will see each other soon
And I know we will see each other soon
And I know we will see each other soon
We will see each other soon
We will see each other
