

## Better Days

Point Of Grace

It's a heart attack a minute  
In this life down here on earth  
We're all stranded right here in it  
Wonderin what it's worth  
There are always threads of trouble  
In this tangled web we weave  
But tomorrow may just be ok  
See here's what I believe

Better days are on the way my friend  
Just a ways on down the line  
I believe that just around the bend  
Everything's gonna be fine  
Better days are just a dream right now  
It's like all you do is pray  
But the world keeps turning  
Bringing us better days

Well the storms won't stop decending  
And the rain won't cease to fall  
And there ain't no use pretending  
Cause it's bound to find us all  
Well it's easy to get hopeless  
And drive yourself insane  
But before you stop  
And set up shop  
In the middle of the pain

Better days are on the way my friend  
Just a ways on down the line  
I believe that just around the bend  
Everything's gonna be fine  
Better days are just a dream right now  
It's like all you do is pray  
But the world keeps turning  
Bringing us better days

I know you've heard all the platitudes  
About attitudes  
And positive thinking  
But time just keeps marching on  
So just hold on  
This too will pass  
I know you'll see your face  
In a smile again

Better days are on the way my friend  
Just a ways on down the line  
I believe that just around the bend  
Everything's gonna be fine  
Better days are just a dream right now  
It's like all you do is pray  
But the world keeps turning  
Bringing us.....

Better days are on the way my friend  
Just a ways on down the line

I believe that just around the bend  
Everything's gonna be fine  
Better days are just a dream right now  
It's like all you do is pray  
But the world keeps turning  
Bringing us better days

Better days, better days  
I believe that just around the bend  
Everything's gonna be fine  
Better days are just a dream right now  
It's like all you do is pray  
But the world keeps turning  
Bringing us.....

I believe in better days.....
