

Lies

Pointed Sticks

Lies, all the things you told me
No base in truth, blatant fiction tales
Lies, obvious evasion
You're speaking words that don't mean a thing

When we are in the same room
You talk like I'm a fool
You think that I believe everything
When really, I don't believe anything

It's all lies, speaking in distortion
Well I have eyes and I'll see the truth
Lies, what you did to me
You're covering up what you want to hide

When I look into your face
I see the lips that lies have had
You think that I believe everything
When really, I don't believe anything

Lies, all the things you told me
No base in truth, blatant fiction tales
Lies, obvious evasion
You're speaking words that don't mean a thing

When we are in the same room
You talk like I'm a fool
You think that I believe everything
You think that I believe everything
You think that I believe everything
When really, I don't believe anything

It's all lies (lies)
