

Best Thing You Ever Had

Poison

Yeah, Blues

I won't ask where you're going
If you don't ask where I've been
'Cause if you're looking for an answer, baby
I wouldn't know where to begin.

I don't know what I want sometimes
But I sure know what I likes
You've got that thing about you
Gets me hot inside

Is wasn't making no sense
When I wrote this song
Cause half way through it
You were turning me on

Lay me down
I just might be your kind
I'll show you a better way
We can do away the time
If you stop looking so hard
I think you just might find
I ain't finding it so bad
Might be the best thing you ever had

You know a little bout love
Well, I know a lot about hate
I believe you gotta make things happen
You believe in fate

But it won't be the first time that we didn't see eye to eye
You may not be religious
But I'll make you see God
If you give me a try

I know love can get me through it
If you give me that look we'll get down to it

Don't shoot me down
I'm not a social disease
You've got that thing about you
Bring a grown man to his knees
I'll teach you baby
Bout them birds and them bees
When you get around
To think about it ain't so bad
Might be the best thing you ever had
Best thing I ever had

Give me some of that

When I put out the dog
get them old ghosts out of bed.....
I ain't looking for a little to say
Baby some place to lay my head, dug

I'm the one to right your wrong
If you give me a chance, I'll turn you on

Lay me down
I just might be your kind
I'll show you a better way
We can do away the time
If you stop looking so hard
I think you just might find
I ain't finding it so bad
Might be the best thing you ever had

Don't shoot me down
I'm not a social disease
You've got that thing about you
Bring a grown man to his knees
I'll teach you baby
Bout them birds and them bees
When you get around
To think about it ain't so bad
Might be the best thing you ever had
Best thing I ever had
