## **Devil Woman**

She'll slide you in, you taste the sin She slowly gets inside your head You feel her take control and she'll steal your soul She's the devil lying in your bed She's the lord of your thighs and it's no surprise You're playing with loaded gun She's a killer queen and she'll lick you clean Then she'll spit you out when she's done

Devil woman, evil woman She'll make you believe L.A. woman, she's my woman Brings out the devil in me

She got blood red lips and head trips Leave a poor boy beggin' for more When you get that itch ain't love a bitch Now you need her just a little more She's a soul taker, a ball breaker And boy she's gonna break you She's gonna steal your heart, steal your money Laugh at you when she's through

Devil woman, evil woman She'll make you believe L.A. woman, she's my woman Brings out the devil in me

Well the way she'll do you Things you ain't never seen She can tear right through you You can never leave

Well the way she'll do you Things you ain't never seen She can tear right through you You can never leave

## Poison
