

All Things Burn

Poni Hoax

And we will walk these streets
While our lust covers the shadows under it's rust
And we will roam these streets
While salvation drives it's way out of our crotch
Then you do it

Wipe my face
Fake a smile
Now I pass a turn
Wipe my senses
Make me lie
All things burn
Wipe my slate
Make me smile
Let's have some fun
And jump the fence
Clean the files
All things burn

Well you do it:
Here it comes
The endless fun
No one cares about
Then you climb in
What's your name?
It should last for a mile
Along your dreams now love
So we will fall along your dreams now love

And now I'm nowhere to be found
For you've hid me deep beneath the cover of your arms
And it is night or day?
Lose control and
Let me choose the way I'll have to pay

Then you do it:
Strike a match
Burn a flag
To keep you warm now
Through the slick furs
I'll lead you to
A place you've always seen
Corridors
Purple lights
A three-legged cat
A brand new nurse
Haunted houses
Hungry words

Well you do it:
Kill this city
Steal my face
Make me learn
Light a fire
Trash my place
For all things burn along your dreams now love
All things burn along your dreams now love

So we will fall along your dreams now love
