

# Save The World

Pop Evil

Is this the end can we stop pretending  
Is this the end when there's nowhere to run  
We're going down right where I started  
Live and die by the gun  
Take them down one by one  
Everywhere I go I can read the signs  
We can save the world and put the past behind

Hold on be strong  
I'll be there for you  
Whether your right or wrong  
If we're running out of time together  
You and I can save the world

This is the end  
This is the end  
This is the end

Is this the end of a life worth living  
Is this the end look at what I have become  
You find the wars say words are treason  
That speak the truth of no return  
Everywhere I go I can read the signs  
We can save the world and put the past behind

Hold on be strong  
I'll be there for you  
Whether your right or wrong  
If we're running out of time together  
You and I can save the world

This is the end  
This is the end  
This is the end

Welcome to the point of no return  
If we're going down I'm ready to burn  
Dancing all around this world of envy  
It's time to save the world

Hold on be strong  
I'll be there for you  
Whether your right or wrong  
If we're running out of time together  
You and I can save the world

Hold on be strong  
I'll be there for you  
Whether your right or wrong  
If we're running out of time together  
You and I can save the world  
Save the world

This is the end  
This is the end  
This is the end
