

# Make Us Insane

Powerman 5000

You're like a satellite  
Spinning down from the sky tonight  
You're blazing a trail with your horns and your tail  
Like a god damn parasite

So, make us the same, make us insane  
Make us insane, make us the same  
We all going down and up in flames tonight, tonight  
(Yeah)

You're like an atom bomb  
Dropping down on a world of right and wrong  
You gave us a choice in your deadliest voice  
And made us all want to sing along  
And that's when the lights go down and the room turns red  
The people all scream they say rock is dead  
And that's how it goes if you like it or not  
Now we're all catching hell cause the devil was hot

So, make us the same, make us insane  
Make us insane, make us the same  
We all going down and up in flames tonight, tonight

So, make us the same, make us insane  
Make us insane, make us the same  
We all going down and up in flames tonight, tonight

That's when the lights go down  
That's when the lights go down  
That's when the lights go down and the room turns red  
The people all scream they say rock is dead  
And that's how it goes if you like it or not  
Now we're all catching hell cause the devil was hot

So, make us the same, make us insane  
Make us insane, make us the same  
We all going down and up in flames tonight, tonight

Make us the same, make us insane  
Make us insane, make us the same  
We all going down and up in flames tonight, tonight

Make us the same, make us insane  
Make us insane, make us the same  
We all going down and up in flames tonight, tonight

That's when the lights go down and the room turns red  
Tonight, tonight  
That's when the lights go down and the room turns red  
Tonight, tonight
