

## Dead Until Dark

Powerwolf

Prone to the grave, the dark side you walk  
in the light of the morning we fall  
Confront the brave, the rebel we stalk,  
when we came - we saw - we conquered them all  
Blessed when we die, confessed not a lie  
in the still of the night we aware  
Don't dare to cry, when fever up high  
no escape - no break - your life we will take

Gone with the night  
when the unholy demons of dawn  
Pray  
when the sunlight is dead we're reborn

We are dead until dark - when the night is calling  
dead until dark - and at midnight high  
dead until dark - and at dawn we all will die

We are dead until dark - when the Saints are crawling  
dead until dark - and the demons fly  
dead until dark - we unite the bloodred sky

Cursed by our fate, the undead crusade  
for the sanctum deep under your skin  
Raise up the blade, by night we invade  
for the last - of times - the fight may begin  
Murder bizarre, nocturnal we are  
when we rise like the phantoms of dust  
Sent from the dead, we long for the red  
for in blood - in god - in heaven we trust
