

Break It Out

Press Play

Shake me up turn me lose got me running
To your love I don't think I want another
You light me up like the sun lights the summer
You rock my world yeah your love has got me spinning
I've been looking I've been searching but I got it
You can keep on looking but I think I found it
The secrets out and we're gonna tell the world of you love

Break it out shout it out let the whole world know
We can rock let it out gotta let it go
Heyo heyo

Turn it up make it loud never stop now
Shout it out your love is like no other
Our time is now the tick tock's getting louder
You're like a song I wanna play you forever
I've been looking I've been searching but I got it
You can keep on looking but I think I found it
The secrets out and we're gonna tell the world of you love

The time is now it's now or never
Let the whole world know
We're not backing down oh no
We'll never stop
It's time to let it go we gotta break it out
