

Fall Asleep For Nuclear War

Pretty Balanced

when you go to sleep you
try to think about small things
so your body slows
and your mind explodes
when the radiation
reaches blankets in the dark
they will keep you safe
but not if you're awake
when you die asleep your dreams will
keep on going
when you die awake
you just die
when you die asleep your dreams will
keep on going
when you die awake
you just die
when you die asleep the
coursing sanguine in your veins
cools and slows and chills
and your body fills
with better things
when you die asleep your dreams will
keep on going
when you die awake
you just die
when you die asleep your dreams will
keep on going
when you die awake
you just die
monsters can't get in your
mother can't get in
the grind
can't get in again
and that is the end
