

Halogen Lamps

Pretty Balanced

halogen lamps
illuminate dark
but only a way
it's dark in the sky
and halogen lamps
will spark in your eye
'til black is as far
as your eye can see
stars are these sparks
that sit in the air
but close are a mass
of gasses and fire
and sparks are a thing
that travel on wire
and glow in a bulb
and light up the room
dark space
fills me
bright light
kills me
dark is a thing
which hides only when
electrical shocks
ignite metal thread
and jolt in a man
to make him fall dead
and light up our brains
to make us believe
we live
dark space
fills me
bright light
kills me
