

Till The Real Thing Comes Along

Pretty Boy Floyd

Girl I know you got something on your mind
Your eyes are telling what your lips try to deny
You can't hide the truth with a disguise
We can't go on living out this lie

We're just pretending it's love
Till the real thing comes along
We're too afraid to let go
And really find what we want

We're still hoping the real thing will appear
So we can walk away but something keeps us here
It's not love but the answer is crystal clear
Being alone is all we really fear

We're just pretending it's love
Till the real thing comes along
We're too afraid to let go
And really find what we want
(2x)

Don't tell me you love me
'Cause you know that it's a lie
We gotta face the truth
It's time to say goodbye

We're just pretending it's love
Till the real thing comes along
We're too afraid to let go
And really find what we want
(2x)

We're just pretending it's love
We're just pretending it's love
Till the real thing comes along
