

# All in the Name of Love

Pretty Maids

I look into the mirror  
The reflection lies  
I feel a rising fear  
I seek a different I

When I look at myself  
I don't like what I see  
Give me the strength to change  
To find a better me

Give me the courage  
To expand my point of view  
Teach me to cope with the results  
From what I do

I found that cruelty  
Has a human heart  
Ever since innocence  
Was ripped and torn apart

I pledge my heart to serve the truth  
I'll stay this course forever  
All in the name of love  
Pay my allegiance to the truth

carry the torch together  
All in the name of love  
I can't erase the past  
I cannot clean the slate  
Nor change the damage done  
My fortune and my fate  
But I can change direction  
Choose another path  
And may the strength of heaven  
Resurrect me back

Chorus

The dark and light  
The wrong and the right  
The essence of mankind  
The pros and the cons  
The moon and the sun  
The eclipse of the human mind

Chorus
